

### Pegasus Springer

Whether installed on their own or with matching multi-functional structures, springer equipment is always popular with the kids.

**+ Design:** shapes and colours have been chosen to match the themes of the multi-functional **PICCOLO**, **CAMELEO** and **VERTIGO** structures and to easily suit every environment.

**+ Fun:** the springer games are available in several themes (vehicles, animals, etc.) enabling children to go on many imaginary journeys and exciting adventures!

Identification	
Catalogue	Play Equipment
Range	Solo+
Universe/Theme	Springer equipment
Page	179
Recreational characteristics	
Age group	3-10 years
Dimensional characteristics	
Equipment dimensions (LxWxH)	1019x400x1445 mm
Maximum free-fall height	0.85 m
Overall dimensions of impact area	3550x2700 mm
Total impact area in m <sup>2</sup>	7.7
Materials	
Handles/Foot rests	Injected polyamide
Seat/Figurine	Rotation moulded thermo-plastic
Standards (tested by an independent laboratory)	
NF-EN 1176 Version 2008	Yes
Installation	
Delivery	Pre-assembled
Foundations -0.40 m	Anchoring system (supplied)
Foundations 0 m	Concrete slab

## + FRAME/STRUCTURE

### ***Robustness that surpasses current standards***

The leg assembly and mechanism are both manufactured in hot-dip galvanised powder-coated steel.

## + THERMOPLASTIC COMPONENTS

### ***Rotation moulded thermoplastic components***

The high-volume or complex-shaped components like the horse's body are made using the rotational moulding technique. For optimum robustness, HUSSON only uses extremely thick, volume-dyed, easy maintenance top-of-the-range materials and an exclusive process for internally reinforcing the stainless steel tubes.

## + QUALITY

### ***High quality materials***

The strong springs, designed for intensive use, are sufficiently flexible to resist being rocked by young children.

The figurines are manufactured in HDPE (High Density Polyethylene), a volume-dyed material which is easy maintenance and can be fully recycled.

## + SAFETY

### ***Anti-catching system***

The anti-catching system, which consists of 2 cast aluminium fixing parts, has been specially designed to eliminate the danger of getting caught on any protruding parts.

## + ANCHORAGE

### ***An efficient anchoring system***

Practical and efficient anchoring system enabling the base to be embedded in a hole measuring 600 x 600 x 550 mm (without concrete).

## + ASSEMBLY

### ***Exclusive assembly system***

- Special anti-loose, vandal-resistant stainless steel bolts (with exclusive HUSSON tool).
- Use of stainless steel and an exclusive\* assembly system on all of HUSSON's ranges enables easy and cost-effective maintenance.
